WORK EXPERIENCE

June – November 2022 in APITech Co., Ltd.

Web Developer

Responsible for updating and developing websites as assigned by supervisors using the WordPress platform, as well as maintaining and servicing computer equipment and IT systems within the organization.

March – April 2020 in PT Motor Car Co., Ltd.

IT SUPPORT

Responsible for maintaining and facilitating the efficient use of computers and IT systems within the organization. This includes monitoring, diagnosing, and resolving technical issues to ensure smooth and uninterrupted workflow for all employees, thereby minimizing any potential disruptions to organizational operations.

PROJECT

2025

Unit Commitment Optimization with Gurobi

Developed a Gurobi-based optimization model for unit commitment in power systems, minimizing fuel costs under operational constraints. Automated data handling and result export via Python and Excel.

2024

IoT Climate Station

Develop an IoT device for monitoring temperature and humidity from multiple locations, with real-time display and data logging to Google Sheets
